## SECOND HYDROGEN UNIT ON STREAM

H2AR, the second Hydrogen Unit of the HDS project, is now on stream. Pentane feed was introduced to the unit at 8 p.m. Thursday, April 22, and by 2 p.m. the next day on-specification hydrogen was being produced. Total starting time, once pentane feed was put into the unit until hydrogen was produced, was only 18 hours. The plant is running at about 50% capacity right now, but is scheduled to be raised shortly to test the limits of the plant. This second Hydrogen Unit startup was under the guidance of Maintenance Coordinator Martinus Leo. Martinus was on special assignment for this startup. Congratulations to Martinus and all of the other able Lago, ERE and TOA HDS project members assisting him.
